

## TMC BOMBS Ver. 1.337 Xtra Beans

Thank you for purchasing a TooMuchCholent Bomb!

We are sure you will have an amazing experience. Please follow the instructions carefully for usage.

TMC takes no responsibility for personnel or property damaged.

### Getting Started

To use your TMC Bomb, start by plugging it into the power. It will immediately begin a countdown, and will explode when the timers done! It's that simple.

### Disabling

Do not unplug the Bomb after plugging in!!! It will explode if you do so.

To disable the Bomb, follow these steps:

1. ☒ ☒ Connect to the bombs access point. The name should be "NotABomb\_", and the password is "ActuallyABomb"
2. ☒ ☒ Each Bomb has a special sequence, that you receive from the store when buying the Bomb. For example,

"10009,16278,23412,17543,56443". To disable the Bomb, you need to send it UDP packets to those ports, in the right order, with less than 5 seconds between each packet.

3. If the Bomb receives the sequence of UDP packets, it should disable itself.

## Warranty

In case of explosion, there is no warranty.
